PRICKLY PEAR	<i>Opuntia ficus-indica</i>	Cultivation - Organic - NOP

AVAILABLE UPON REQUEST / RESERVATION

Our Organic Fresh Plants, Young Shoots, or Buds

ORGANIC FRESH PLANTS

From A as in «Absinthium» to Z as in «Zea Maïs,» we have the expertise to harvest a selection of over 700 wild plants, primarily from France and Morocco. Among our major references are Yellow Gentian, Arnica Montana, and the iconic buds of Gemmotherapy such as Blackcurrant, Fig, and Birch. We invite you to contact us for any specific requests regarding plants not included on this list.

Each year (as part of a planned program), we harvest a wide variety of fresh organic medicinal plants, including buds and young shoots. All these plants and buds can be supplied fresh, frozen, or stabilized. This line of organic products is primarily designed to meet the specific needs of gemmotherapy, homeopathy, and cosmetics.

Organic Young Shoots, Fresh Plants, and Buds

ENGLISH NAME	LATIN NAME	PART	TYPE
